Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On page 14, line 16, change "barn wall 54" to --barn wall 52--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 8, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by **Hollingsworth (646,218)**. **Hollingsworth** discloses a tobacco curing apparatus (Figure 3) in a tobacco barn (Figure 1) having a plurality of internal cross members (3) for supporting tobacco leaves during curing and includes a plenum (4c) attached to the barn (SEE column 2, lines 91-96), a device for moving air (air generator, line 95) in connection with the plenum, a plurality of conduits (5) in fluid communication with the plenum for receiving airflow therefrom, a plurality of attachment members (2 & 3) for mounting the conduits within the barn, the conduits having a plurality of openings (SEE Figures 4 & 4a) and allow air to flow outwardly therefrom. The tobacco is placed in overlying fashion in which they cover some portion of the conduits (5) (SEE Figure 2);

Art Unit: 3749

air from the air generator flows through the plenum into the conduits and out of the plurality of openings onto the tobacco for curing.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15 and 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Hollingsworth (646,218)**. **Hollingsworth** discloses the claimed invention except that the material the plenum (4c) is made of is not discussed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a transparent or opaque piping plenum structure for attaching to an air generator, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Allowable Subject Matter

Claims 16-24 and 34 are allowed.

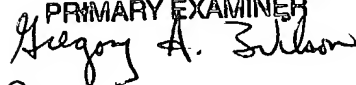

Art Unit: 3749

Claims 2-5, 7, 9-12, and 26-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
